## **DETAILED ACTION**

### ***Claim Objections***

Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by US PAT 6,505,774 to Fulcher et al. (Fulcher).

As to claim 1, Fulcher discloses a parking meter (fig 1), for indicating a paid parking time (on the ticket) and with a central control device (512), a return device is provided for the return of payment corresponding to the parking time not used (col 18, lines 49-51).

As to claim 2, the system uses a read-write unit for a card (col 2, lines 47-51).

As to claim 3, a code can be assigned to the card (for the time and date of entry).

As to claim 4, the system includes a keyboard (col 13, lines 11-15) for accepting information.

Note: While not included in the rejection, in the interests of compact prosecution, the examiner will alert applicant that the limitations of claims 5-10 are also disclosed by Fulcher.

As to claims 5 and 10, the battery is 528.

As to claim 6, this has been discussed in relation to claim 1.

As to claim 7, the chip card has been discussed.

As to claim 8, the card is codified, as discussed.

As to claim 9, a parking time is inherently selected as the system is shown to give a refund for parking less time than expected.
